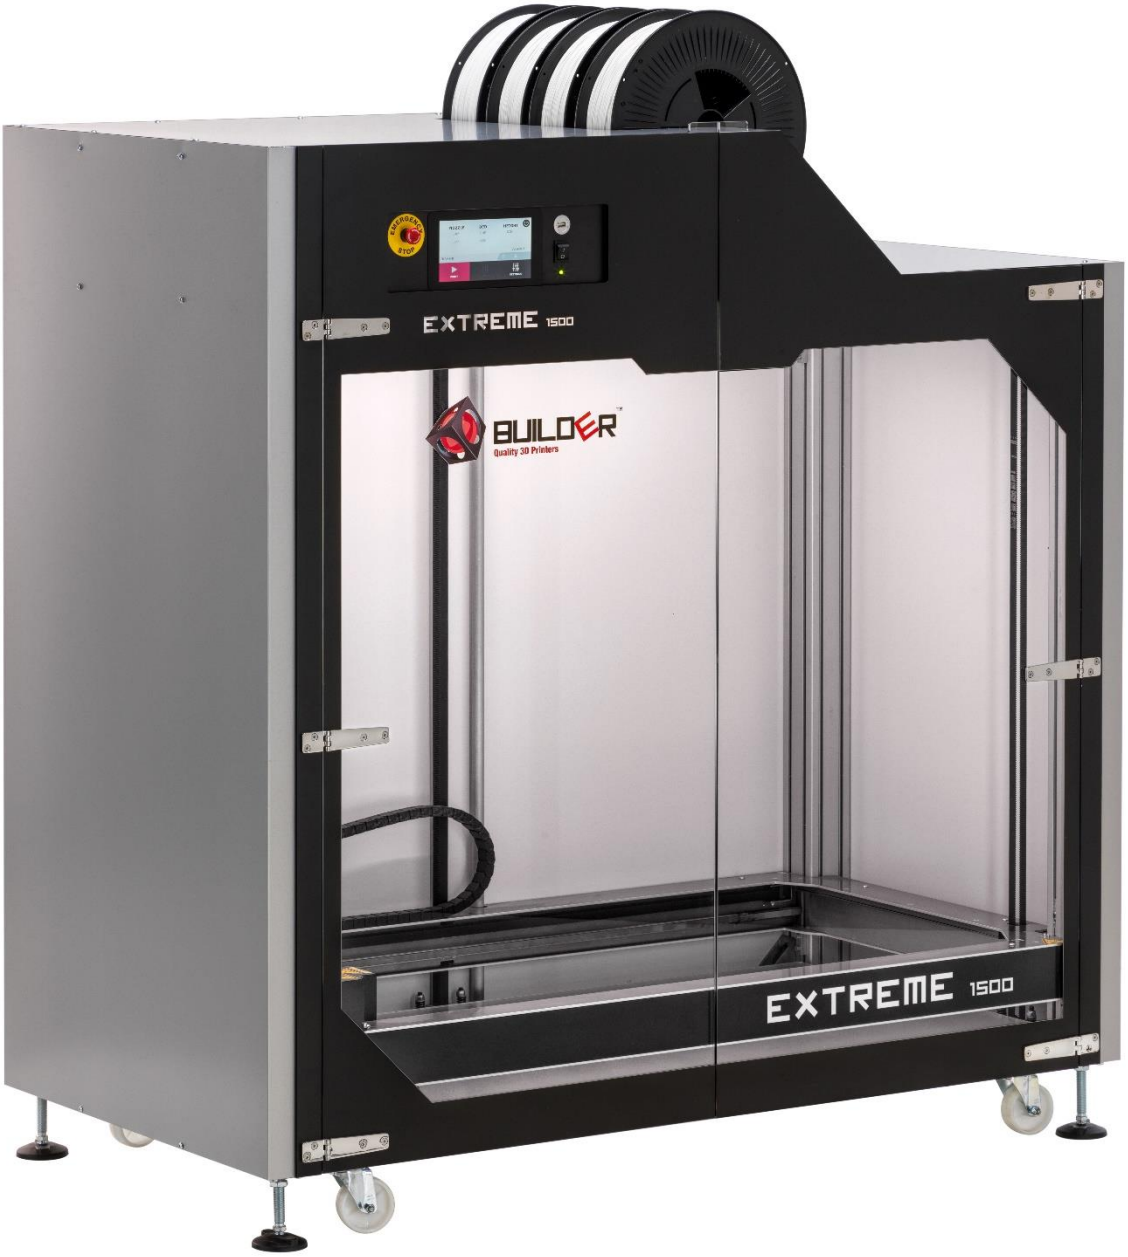
Meet the Builder Extreme 1500 PRO

Large Scale 3D Printing Made Affordable and Accessible



Thank you for your interest in the Builder Extreme 1500 PRO.

The Extreme 1500 PRO is one of the biggest FDM 3D printers available. With a build volume of 1100x500x820 mm, it allows you to print extremely long and large prototypes/objects. The Builder Extreme comes with many features such as a 7 inch touch display, heated bed, filament detection and an integrated ups system – resume after power outage. These features make large scale 3D printing worry free.
