Nitrogen oxides (NO_x)
Hydrogen cyanide (hydrocyanic acid)
Ammonia

5.3 Advice for firefighters

Special protective equipment for firefighters : Exposure to decomposition products may be a hazard to health. In the event of fire, wear self-contained breathing apparatus.

Further information : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Use water spray to cool unopened containers.
In the event of fire and/or explosion do not breathe fumes.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : Provide for appropriate exhaust ventilation and dust collection at machinery.
The material can accumulate static charge and can therefore cause electrical ignition.
Minimize dust generation and accumulation.
Dust must be collected and disposed of carefully.
Wear personal protective equipment.
Do not breathe vapours/dust.

Advice on protection against fire and explosion : Take measures to prevent the build up of electrostatic charge.
During processing, dust may form explosive mixture in air.
Keep away from heat and sources of ignition. Normal measures for preventive fire protection.

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice.
Avoid contact with skin, eyes and clothing.
Wash hands before breaks and immediately after handling the product.
Regular cleaning of equipment, work area and clothing.
Keep away from food and drink.
General industrial hygiene practice.
When using do not eat, drink or smoke.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep containers tightly closed in a dry, cool and well-ventilated place.

Further information on storage conditions : Keep away from heat and sources of ignition. Keep away from direct sunlight. Avoid moisture.

Advice on common storage : Keep away from food, drink and animal feedingstuffs.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Contains no substances with occupational exposure limit values.

8.2 Exposure controls

Engineering measures

Provide sufficient air exchange and/or exhaust in work rooms.
Handle product only in closed system or provide appropriate exhaust ventilation at machinery.
Apply measures to prevent dust explosions.

Personal protective equipment

Eye protection : Safety glasses with side-shields

Hand protection
Material : Protective gloves

Remarks : The suitability for a specific workplace should be discussed with the producers of the protective gloves.
The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other.
As the product is a mixture of several substances, the durability of the glove materials cannot be calculated in advance and has to be tested before use.
The exact break through time can be obtained from the protective glove producer and this has to be observed.
The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case.
Request information on glove permeation properties from the glove supplier.
Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work.

Skin and body protection : Safety shoes
Wear suitable protective clothing.

Respiratory protection : Effective dust mask
In the case of vapour formation use a respirator with an approved filter.

Protective measures : Follow the skin protection plan.
