To Whom it May Concern,

All Markforged's plastic and fiber consumable materials (See Table I for covered materials) comply with the requirements of:

- EU Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment. This directive is commonly referred to as the RoHS2 directive and it went into effect January 2013 per the European Commission.
- EU Directive 2015/863/EU amending Annex II to Directive 2011/65/EU of the European Parliament and of the Council as regards the list of restricted substances, that adds 4 phthalates to the list of restricted substances in Annex II to directive 2011/65/EC. This directive will come into force July 22, 2019.

We further certify that the following substances are not used in the manufacture of our plastic and fiber consumable materials:

- REACH SVHC Candidate chemicals above 0.1% (209 Substances; Last updated June 25, 2020: <http://echa.europa.eu/candidate-list-table>)
- Conflict minerals: columbite-tantalite (coltan), cassiterite, gold, wolframite and the derivatives tantalum, tin and tungsten

We have also ensured that all substances in our consumable materials have been pre-registered where that is required under REACH and that the imports of our customers will be covered under the pre-registered volume.
